

Environmental law and public procurement Lawyer 11/01/2019

Company description:

In the context of the further development of the Public Law and Real Estate Development Department, you will contribute to our Antwerp office within the domains of administrative law related to real estate. These include procurement law, public-private partnerships, environmental law (environmental planning and permits), expropriation, property development, socio-economic licenses, real estate contracts, etc. As a lawyer you will provide an extensive range of services to our clients (litigation, legal advice, drawing up contracts, etc.).

Function

As a lawyer you will provide an extensive range of services to our clients (litigation, legal advice, drawing up contracts, etc.).

Searched profile

Requirements: You have obtained a Belgian Master's degree in Law with excellent study results and ideally you already have 2 to 3 years of relevant experience. You have excellent legal and language skills. We are looking for lawyers with fluent Dutch. You have an excellent level of English and a good knowledge of French.

Profile: You have organizational talent and you are a proactive, flexible team player. You know how to distinguish priority issues and to handle multiple and complex tasks effectively. Accuracy, confidentiality and punctuality are your hallmarks. You want to work in a challenging environment that is also very satisfying.

Offer

We offer you a unique and challenging position. You will have the opportunity to collaborate with top lawyers and further develop your own skills. Successful candidates will work in an extremely interesting and challenging environment.
