

Event 25/10 - "Digital Transformation: formulating a legal tech strategy"

When: Thursday, October 25, 12:00-14:00

Where: BLOOMZ, Lambroekstraat 5A, 1831 Diegem ([click for map](#))

As the role of the general counsel continues to change, in-house teams are increasingly collaborating with other departments across the business, which means there's a larger volume of information to manage. However, a 2017 survey found that only 2 in 5 legal departments had taken steps to innovate their legal department including adopting technology.

To reduce the time spent searching for documents, increase efficiency and collaboration, legal departments are increasingly turning to cloud-based software. However, navigating the legal tech landscape can be an overwhelming task.

Join the event brought to you by **effects by Wolters Kluwer** and **Vialegis** and get best practices for adopting legal tech that aligns with your business strategy, learn do's and don'ts in implementing legal tech and network with peers and legal tech experts.

What you can expect by attending:

- Get tips from subject-matter expert Barend Blondé on developing a legal tech strategy
- Discover how legal tech can increase productivity and efficiency
- Do's and don'ts when implementing cloud-based legal tech tools
- Network with peers and legal tech experts

Agenda:

12:00-12:15 Arrival and lunch
