

Computers, Privacy & Data Protection 2019: DATA PROTECTION & DEMOCRACY

CPDP offers the cutting edge in legal, regulatory, academic and technological development in privacy and data protection. CPDP gathers academics, lawyers, practitioners, policy-makers, computer scientists and civil society from all over the world to exchange ideas and discuss the latest emerging issues and trends. Each year, CPDP offers a compelling and diverse line-up of speakers and panels. This unique multidisciplinary formula has served to make CPDP one of the leading data protection and privacy conferences in Europe and around the world.

CPDP2019 adopts “**Data Protection & Democracy**” as its overarching theme to pave the way for a timely and thorough discussion over a broad range of ethical, legal and policy issues related to new technologies and data analytics. CPDP2019 will offer more than 80 panels addressing current debates in the area of information technology, privacy and data protection. The preliminary programme for CPDP2019 has been released and the line-up contains excellent panels. Session topics range from blockchain, cross-border access to e-evidence, Big Data in health care to data protection impact assessments, collective redress, privacy by design, data and elections, predictive policing, and much more. CPDP is also an extraordinary networking opportunity to mix and mingle with the privacy and data protection community.
