

## EU regulatory milestones timeline in 2021

### Linklaters

The EU legislative machine is in full swing. We have put together a one page timeline to help you anticipate and keep track of the evolution of draft EU laws and of milestones in the lifecycle of EU acts, in selected areas - business & human rights, competition, energy & environment, financial services (including capital markets, banking, sustainable finance and fintech), tax and tech. Browsing through the timeline, you will see, inter alia, when to expect the release of new draft laws or acts implementing existing rules, the start of the review process for flagships rules for your industry or the entry into force of legislation that will impact your business.

The timeline is indicative and subject to change, depending on political discussions or the internal decision-making process of the EU institutions.
